Summary

Python Full Stack Developer skilled in Python, Django, Flask, FastAPI, React.js, REST APIs, JWT authentication, and SQLite. Built 24+ web and desktop applications with experience in full-stack development, database management, authentication, and real-time communication. Currently pursuing a BBA and seeking an entry-level or junior Full Stack Developer role.

Skills

Programming: Python, JavaScript, HTML5, CSS3
Frontend: React.js, Bootstrap, HTML5, CSS3, JavaScript
Backend: Django, Django REST Framework, Flask, FastAPI
API & Authentication: REST APIs, JWT Authentication, CRUD, Postman
Databases: SQLite, SQL, Database Design
Desktop Development: Python, Tkinter
Networking: Socket Programming, Client-Server Architecture, Real-Time Communication
Development Tools: Git, GitHub, VS Code, Postman

Projects

Full Stack Job Portal *React.js, Django, REST API*

- Developed a full-stack job portal using React.js and Django with JWT-based authentication and REST API integration.
- Implemented user registration, login, profiles, job posting, job management, CRUD operations, and resume uploads.
- Designed structured frontend and backend workflows for job seekers and job management.

Hospital Management System *Python, Tkinter, SQLite*

- Built a desktop hospital management application for patient registration, treatment tracking, billing, and administrative record management.
- Implemented secure admin authentication, patient records, automated billing, and CSV report generation.
- Integrated SQLite for persistent storage and structured database management.

Smart Bank Management System *Python, Tkinter, SQLite*

- Developed a desktop banking application supporting account creation, deposits, withdrawals, and fund transfers.
- Implemented transaction history, timestamps, and real-time balance display.
- Designed database-driven workflows for managing customer accounts and financial transactions.

Student Management System *Python, Tkinter, SQLite*

- Developed a student management application for maintaining student records, attendance, and academic performance.
- Implemented record creation, updating, searching, and database management using SQLite.
- Designed a user-friendly Tkinter interface for efficient academic record management.

Real-Time Chat Application *Python, Socket Programming, Tkinter*

- Built a real-time client-server chat application using Python socket programming and Tkinter.
- Implemented network communication for sending and receiving messages between connected clients.
- Designed a graphical chat interface for local network-based real-time communication.

Certificates

Diploma in Multimedia
Professional training covering multimedia concepts and digital tools.

Graphic Animation Program (GAP)
Training in graphic design and animation fundamentals.

Microsoft Office Essentials
Training covering Microsoft Office applications, including Microsoft Word and Excel.

Education

Bachelor of Business Administration (BBA) Allama Iqbal Open University
In Progress
